**Centers and Stations** DK Children Boost second-grade (ages 6 to 8) reading, writing, and math skills with the activities in this Ready to Learn workbook. Ready to Learn: Second Grade Workbook helps kids ages 6 to 8 gain the confidence they need to excel in second-grade reading, writing, and math. Building on the foundation of skills attained in first grade, this 240-page

book is packed with activities that cover those three key topics and adhere to Common Core State Standards for the second-grade level. Colorful illustrations help develop vital skills in phonics, grammar, punctuation, multiplication, and more. Introduces concepts and techniques to be taught in second grade. Reinforces skills learned in first-grade reading, writing, and math. 240 full-

color and illustrated pages. Meets Common Core State Standards. Answer key at the end of the book. Get to know the Ready to Learn series! Developed for kids entering pre-kindergarten all the way through third grade, Silver Dolphin's Ready to Learn series of educational and engaging workbooks, workpads, write & wipe formats, and flash cards will put young learners on the path to

success. Focusing on three key subjects—reading, writing, and math—each grade level is vetted by experts in early education to adhere to the Common Core State Standards Initiative. Foundational, buildable skills are introduced, developed, and reinforced with colorful illustrations and familiar learning formats that will encourage learning confidence as kids benefit

from extra educational opportunities outside the classroom. **Spectrum Critical Thinking for Math, Grade 2** The Studious Kidz Help second grade students master Common Core skills such as understanding point of view, forming contractions and possessives, counting by 5s, and more with Common Core Language Arts and Math for grade 2. Take the mystery out of the

Common Core with these unique and timely Spectrum 128-page books. These information-packed resources for kindergarten through grade 6 provide an overview of the standards for each grade level along with practice activities for school success. Includes explicit references to the standards on each practice page that will let parents know that activities provide direct support for

skills being taught at school.  
**Second Grade Subtraction**  
Carson-Dellosa Publishing Mastering second grade subtraction skills is fun and exciting with this book that combines problem solving activities with puzzles and humor to reduce learning anxiety and build essential skills. Understanding subtraction is an important building block for future learning, and

Highlights(TM) infuses Fun with a Purpose® into this essential math activity for second graders. Our award-winning content blends math with puzzles and humor, which makes learning subtraction enjoyable while reducing math anxiety. With second grade subtraction strategies like regrouping and borrowing, this book will help students grasp basic math concepts and build their confidence in

----- This book has everything a parent or a teacher would need to have to instill the love for Math in a second grader's heart. It was written by a parent of a second

grader, with a long and lasting passion for math, who started to go to math contests when he was at his son's age. He wanted to share with his son everything he knew and loved about Math. This book is also an experiment, a documented approach to Math teaching that goes beyond curriculum, and inspire the imagination and the creativity. The kids can learn

about famous Math prodigies like Srinivasa Ramanujan, a self-taught mathematician, or Terence Tao, the youngest participant to date in the International Math Olympiad. They can also learn about astronauts whose determination and math knowledge helped them to survive in critical missions. And they can also solve the hundreds of problems in the book, specially tailored for

Math contests for second grade. The problems are arranged in 4 levels of difficulty that can take the child to very high performances in Math. This is an ongoing experiment, so please join us in our journey and see how far along we can go. Drop us a line of encouragement and feel free to praise the kids when they reach the milestones. They will appreciate and feel obliged. You can find us at

www.facebook.com/mathexperiment.In short, this is what the book is about: 300 word problems for high achievers Tested methods for successfully running a Math Club for 2nd graders Information about math contests and math personalities across the world 4 levels of difficulty that can gradually bring the students to very high math performances Full solutions for all the

problems, not just answers

This teacher-friendly e-Book provides thematic units that connect to a standards-based skill that second grade students are expected to know to advance to</p>	<p>the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). designed for students to "Read-Along, Sketch and Solve." The format is ideal for special education, intervention groups or guided math groups. Each problem is presented in a full-page format to give students enough space to investigate multiple ways to solve the problem. The word "sketch" is intentionally used on all pages. Before students begin work, we often discuss how to represent objects using

quick sketches as opposed to time-consuming detailed pictures. These word problems for grade 1 are designed with the rigor of the Common Core in mind and support the following standards: CCSS.Math.Content.K.OA.A.2 Solve addition and subtraction grade 1 math word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

CCSS.Math.Content.1.OA.A.1 Use addition and subtraction within 20 to solve word problem grade 1 involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem. ( These are beginning of the year first

grade problems - working within groups of ten.\*\*) Each sheet includes: A place for students to sketch the problem. A ten frame for students to utilize. I encourage students to cross out items that are taken away as they work with the ten frame for subtraction. A number path on which students show their work. A space for an equation. A space to fill the answer in. Click on the

preview to read why a number path is used instead of a number line. As I introduce the first few problems with a group, we work through each section together and students complete each box on the sheet. Once students are familiar with the ways these sheets support their problem solving, I often have each student choose at least 2 ways to show and check their work. This allows each

student to utilize the methods that are most efficient for him/her. I love to give students time to discuss why they chose certain methods to solve a problem! Each sheet includes an extension/bonus question at the bottom. These question cards can be used in a variety of ways. Many parents want to help their child develop math concepts, but are not sure how. These bonus

questions are perfect extension activities for students to discuss and complete at home with a family member. I love to see the extension work that students return! Many parents have commented that they appreciate the challenging nature of these questions. When these word problems 1st grade are used for whole-group instruction, it is common for some students

to have completed tasks while others still need support. "Early finishers" can read-along with you as you introduce the bonus question, flip their paper over and work on this challenge question while you provide individual and/or small group instruction as needed. In this way, these bonus questions help teachers differentiate during group lessons. Many thanks for stopping by

and taking a look!

 Children

The purpose of this study was to determine if teaching mathematics kinesthetically to subjects in

second grade through word problems had a greater impact than teaching through rote memorization. There is much debate over which is the better method of teaching word problems. Research has shown that when kinesthetics and manipulatives are used correctly in a classroom, it can be more beneficial to young subjects. The experimental group for this study learned six different

types of addition and subtraction word problems using movement and manipulatives. The focus of teaching was on the action involved with each problem rather than searching for key words. It was believed that by acting out word problems, subjects would have a deeper level of understanding and would be able to easily explain how the problem was solved. The subjects solved each

problem through the use of kinesthetics and manipulatives before using abstract thinking. The control group solved word problems using rote	memorization and incidental use of manipulatives. The pre and post-tests examined their ability to write the correct number sentence,	solve the problem, and explain how they got their answers. Through the use of ANOVA, results were analyzed to determine the differences between the two groups.
