Annual Directory [of] Engineering College Research and Graduate Study München ; New York : Hans Zell Publishers

The primary human activities that release carbon dioxide (CO₂) into the atmosphere are the combustion of fossil fuels (coal, natural gas, and oil) to generate electricity, the provision of energy for transportation, and as a consequence of some industrial processes. Although aviation CO₂ emissions only make up approximately 2.0 to 2.5 percent of total global annual CO₂ emissions, research to reduce CO₂ emissions is urgent because (1) such reductions may be legislated even as commercial air travel grows, (2) because it takes new technology a long time to propagate into and through the aviation fleet, and (3) because of the ongoing impact of global CO₂ emissions. Commercial Aircraft Propulsion and Energy Systems Research develops a national research agenda for reducing CO₂ emissions from commercial aviation. This report focuses on propulsion and energy technologies for reducing carbon emissions from large, commercial aircraft—single-aisle and twin-aisle aircraft that carry 100 or more passengers—because such aircraft account for more than 90 percent of global emissions from commercial aircraft. Moreover, while smaller aircraft also emit CO₂, they make only a minor contribution to global emissions, and many technologies that reduce CO₂ emissions for large aircraft also apply to smaller aircraft. As commercial aviation continues to grow in terms of revenue-passenger miles and cargo ton miles, CO₂ emissions are expected to increase. To reduce the contribution of aviation to climate change, it is essential to improve the effectiveness of ongoing efforts to reduce emissions and initiate research into new approaches.

Philosophy in Education Rowman & Littlefield

To create an enhanced quality of life, attract business relocation, and enhance equity in access to public infrastructure, governmental bodies must take certain precautions with their

money. Budgeting at such a high level requires careful evaluation and research that addresses every aspect of financial management. Capital Management and Budgeting in the Public Sector provides emerging research exploring the theoretical and practical aspects of long-term capital planning, annual capital budgeting, capital budget execution, and public spending evaluation. Featuring coverage on a broad range of topics such as fiscal federalism, political regime, and project execution management, this book is ideally designed for managers, accountants, professionals, practitioners, and researchers working in the areas of public finance and/or international development.

The World Who's who of Women John Wiley & Sons

Philosophy in Education: Questioning and Dialog in K-12 Classrooms is a textbook in the fields of pre-college philosophy and philosophy of education, intended for philosophers and philosophy students, K-12 classroom teachers, administrators and educators, policymakers, and pre-college practitioners of all kinds. The book offers a wealth of practical resources for use in elementary, middle school, and high school classrooms, as well as consideration of many of the broader educational, social, and political topics in the field, including the educational value of pre-college philosophy, the philosophies of education that inform this philosophical practice, and the relevance of pre-college philosophy for pressing issues in contemporary education (such as education reform, child development, and prejudice and privilege in classrooms). The book includes sections on: the expansion of philosophy beyond higher education to pre-college populations; the importance of wondering, questioning and reflection in K-12 education; the ways that philosophy is uniquely suited to help students cultivate critical reasoning and independent thinking capacities; how to develop classroom communities of philosophical inquiry and their potentially transformative impact on students; the cultivation of philosophical sensitivity and positive identity formation in childhood; strategies for recognizing and diminishing the impact of social inequalities in classrooms; and the relationship between introducing philosophy in schools and education reform.

Optical Engineering Channel View Publications

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

Who's who in Australasia and the Far East National Academies Press

Publishes papers reporting on research and development in optical science and engineering and the practical applications of known optical science, engineering, and technology.

Capital Management and Budgeting in the Public Sector IGI Global

This book explores the minority situation of women in university teaching, especially their scarcity at professoriate level.

APS Observer Trentham Books

A list of all the women of the world who have, in one way or another, achieved something

Rangelands Walter de Gruyter GmbH & Co KG

This book provides an authoritative, state-of-the-art review of tour guiding scholarship and research. It aims to foster best practice and to stimulate further study and research on tour guiding across a range of disciplines. The book is well-illustrated and its accessible style with chapter summaries makes it ideal for students as well as researchers.

Commercial Aircraft Propulsion and Energy Systems Research John Wiley & Sons

A weekly record of scientific progress.

Final Environmental Impact Report, California Marine Life Protection Act Initiative, Central Coast Marine Protected Areas Project McFarland

Given the highly trained library workforce now available and the vast and growing array of packaging information and knowledge, libraries have the capacity to become pre-eminent places of learning, research, and teaching. Yet, despite this potential, libraries remain divided from their constituencies and their governing bodies, be they students, faculties, university administrations, municipal governments, or ordinary citizens. Indeed, many modern university administrators, viewing librarians as ancillary citizens in academe, have allowed their libraries to wither under the burden of shrinking budgets, staffing

inadequacies, and deteriorating facilities. This thought-provoking volume by a 35-year veteran of academic libraries identifies, diagnoses, and provides remedies to the damaging divisions in and between libraries and librarianship, arguing that the processes of teaching constitute the genuine context in which to steer librarianship into the future.

Rocky Mountain Science Council Newsletter Cambridge University Press

"Undergraduate research is a high-impact practice that sparks students' interest in learning and love for the discipline, and it improves retention, student success, graduation rates, and postgraduation achievement. Many individual campuses have offered these programs for several years, and the Council on Undergraduate Research (CUR) has supported their efforts in many ways. More recently CUR has partnered with state systems of higher education and public and private consortia to foster the institutionalization of undergraduate research at the member

institutions and across the systems/consortia."--From publisher.

Encyclopedia of E-Leadership, Counseling and Training offers an in-depth description of key terms and concepts related to different themes, issues, and trends in educational leadership, counseling, and technology integration in modern universities and organizations worldwide. This three volume work serves as an exhaustive compendium of expertise, research, skills, and experiences. Authors with a background in education, leadership, counseling, management, human resource development, or adult education have helped to encourage the education and training of potential leaders with this scholarly work.

Science, Technology and American Diplomacy, the Political Legacy of the International Geophysical Year, Prepared for the Subcommittee on National Security Policy and Scientific Developments..., by Harold Bullis..., November 1973 Melrose Press, Limited

The development of students is a fundamental purpose of higher education and requires for its success effective advising, teaching, leadership, and management. This annual volume offers examples and resources for the enrichment of all educational developers.

To Improve the Academy Routledge

A biographical record of contemporary achievement together with a key to the location of the original biographical notes.

Black Issues in Higher Education

Brings scientists, policy makers, land and water managers and citizen stakeholders together to resolve natural resource and environmental problems.
