## **GUADALUPE WASHINGTON**

[Designer Drugs Directory](#) Celadon Books

Fascinating profiles of thirteen researchers and scientists whose ground-breaking research in the microscopic world set the foundation for the current fight against viruses such as SARS-CoV and HIV/AIDS.

**Verbal Behavior** Loompanics Unltd

This is our blood and guts section. These books are the most gruesome and terrifying of any in our entire catalog. Enjoy Underground chemist par excellence Uncle Fester turns his attention to poisons -- and the result is Silent Death. A complete guide to poisons, their administration and detection. Inorganic Poisons -- War Gases -- Nerve Gas -- CIA Shellfish Toxins -- Time Delay Poisons -- Botulism -- And much more. Sold for informational purposes only.

**Methamphetamine Abuse and Addiction** Library of Alexandria

The New York Times–bestselling “first-rate spy thriller” of the FBI agent who sold top-secret information to the Russians for more than twenty years (Entertainment Weekly). Drawing from a wide variety of sources in the FBI, the Justice Department, the White House, and the intelligence community, Pulitzer Prize–winning author David A. Vise tells the story of how FBI counterintelligence agent Robert Philip Hanssen employed the very sources and methods his own nation had entrusted to him in a devious game of deceit—simply because he had something to prove. Vise also interweaves the narrative of how FBI director Louis J. Freeh led the government’s desperate search for its betrayer among its own ranks, from the false leads, to the near misses, to its ultimate, shocking conclusion. Fascinating, gripping, and provocative, *The Bureau and the Mole* is a harrowing tale of how one man’s treachery rocked a fraternity built on fidelity, bravery, and integrity—and how the dedicated perseverance of another brought him to justice. “Absorbing . . . Vise’s account of Mr. Hanssen’s road to becoming a double agent is fascinating.” —Michiko Kakutani, *The New York Times*

*The Life, Letters and Work of Frederic Leighton (Complete)* Back Bay Books

"A fascinating, timely, and often disturbing history of how underground do-it-yourself weapons manuals have influenced violent radicalism, and how the state has responded"--

*Practical LSD Manufacture* Bloomsbury Publishing

Hells Angels and fallen televangelist Ted Haggard. Cross-country truckers and suburban mothers. Trailer parks, gay sex clubs, college campuses, and military battlefields. In this fascinating book, Frank Owen traces the spread of methamphetamine—meth—from its origins as a cold and asthma remedy to the stimulant wiring every corner of American culture. Meth is the latest "epidemic" to attract the attention of law enforcement and the media, but like cocaine and heroin its roots are medicinal. It was first synthesized in the late nineteenth century and applied in treatment of a wide range of ailments; by the 1940s meth had become a wonder drug, used to treat depression, hyperactivity, obesity, epilepsy, and addictions to other drugs and alcohol. Allied, Nazi, and Japanese soldiers used it throughout World War II, and the returning waves of veterans drove demand for meth into the burgeoning postwar suburbs, where it became the "mother's helper" for a bored and lonely generation. But meth truly exploded in the 1960s and '70s, when biker gang

cooks using burners, beakers, and plastic tubes brought their expertise from California to the Ozarks, the Southwest, and other remote rural areas where the drug could be manufactured in kitchen labs. Since then, meth has been the target of billions of dollars in federal, state, and local anti-drug wars. Murders, violent assaults, thefts, fires, premature births, and AIDS—rises in all of these have been blamed on the drug that crosses classes and subcultures like no other. Acclaimed journalist Frank Owen follows the users, cooks, dealers, and law enforcers to uncover a dramatic story being played out in cities, small towns, and farm communities across America. No Speed Limit is a panoramic, high-octane investigation by a journalist who knows firsthand the powerful highs and frightening lows of meth.

*Speed-speed-speedfreak* The Buffness Diaries

This celebration of the Second Amendment makes the point that if one's ammunition is made useless, what one has is then the de facto repeal of the Second Amendment. This repeal would have disastrous consequences, as shown by many historical examples given in the text wherein the disarmament of the civilian population was the prelude to mass homicidal or genocidal slaughters. In the text, I detail which types of ammunition are suitable for use against body armor clad intruders, and then I proceed to give in great detail how to increase their usefulness by coating the projectile with a layer of teflon. Coating details are given for both commercially available ammunition, and for home turned solid steel projectiles.

*Secrets of Methamphetamine Manufacture* Courier Dover Publications

The infectious tales and astounding details in 'The Disappearing Spoon' follow carbon, neon, silicon and gold as they play out their parts in human history, finance, mythology, war, the arts, poison and the lives of the (frequently) mad scientists who discovered them.

*Vest Busters* Applewood Books

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

*Discovering Statistics Using R* Loompanics Unltd

"Look at daddy, sweetheart. Tell him what you want" I smiled up at him waiting to taste his flavor. Jason Okawmmay wrapped me around his finger and I couldn't get away, but the truth is that I loved it. I didn't want this forbidden love affair to end. Jason Steele Okawmmay, the Director at Forest Hospital for those with disabilities is the husband every woman wishes for, prays for, dreams of, and wants! A kind heart, protective and loyal. But, his world is turned upside down when his wife revealed her honest mistakes. For 10 years he lives with the pain and broken heart while trying to make his marriage work. With three young boys together, he faces the reality of self-love. When his best friend brings him along to an event for charity he meets a woman who takes his breath away, Ariel Vinte. With chemistry building between them, they become closer. Ariel despises those who involve themselves in other's relationships. But, her biggest nightmare has come true. She falls for Jason Okawmmay, a man with hidden secrets that nobody knows, not even his wife. Affairs are oftentimes messy and complicated, will this one turn out the same way when his wife suspects him cheating?

*Silent Death* Doubleday Canada

A practical and transformative 5-step strategy to ensure the emotional wellbeing of yourself and your child The mental wellbeing of children and adults is shockingly poor. Marc Brackett, author of *Permission to Feel*, knows why and what we can do. Marc Brackett is a professor in Yale University's Child Study Center and in his 25 years as an emotion scientist, he has developed a remarkably effective plan to improve the lives of children and adults - a blueprint for understanding our emotions and using them wisely so that they help, rather than hinder, our success and well-being. The core of his approach is a legacy from his childhood, from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc, listen to him, and recognise the suffering, bullying, and abuse he'd endured. In the decades since, Marc has

led large research teams and raised tens of millions of dollars to investigate the roots of emotional wellbeing. His prescription for healthy children (and their parents, teachers, and schools) is a system called RULER, a high-impact and effective approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it. RULER has been proven to reduce stress and burnout, improve school climate, and enhance academic achievement. This book is his way to share the strategies and skills with readers around the world. It is tested, and it works.

*The Disappearing Spoon* Elsevier

In 1934, at the age of 30, B. F. Skinner found himself at a dinner sitting next to Professor Alfred North Whitehead. Never one to lose an opportunity to promote behaviorism, Skinner expounded its main tenets to the distinguished philosopher. Whitehead acknowledged that science might account for most of human behavior but he would not include verbal behavior. He ended the discussion with a challenge: "Let me see you," he said, "account for my behavior as I sit here saying, 'No black scorpion is falling upon this table.'" The next morning Skinner began this book. It took him over twenty years to complete. This book extends the laboratory-based principles of selection by consequences to account for what people say, write, gesture, and think. Skinner argues that verbal behavior requires a separate analysis because it does not operate on the environment directly, but rather through the behavior of other people in a verbal community. He illustrates his thesis with examples from literature, the arts, and sciences, as well as from his own verbal behavior and that of his colleagues and children. Perhaps it is because this theoretical work provides a way to approach that most human of human behavior that Skinner offer called Verbal Behavior his most important work.

*Handbook of Forensic Drug Analysis* Lulu.com

This classic now in its third edition covers all the best methods used to make LSD. The emphasis is upon natural sources of lysergic acid such as wild ergot, morning glory seeds or woodrose seeds, but extraction of ergotamine migraine medicines are also detailed. Once the lysergic acid has been procured from these sources, the text moves on to detailed descriptions of the methods used to convert lysergic acid to LSD. The text does not stop there! It also gives detailed information on the chemicals used to make LSD in combination with lysergic acid, and what ordinary uses they have. The book also covers solvent management since extraction of lysergic acid from natural sources entails the use of a considerable amount of solvents. To further entertain the reader, a section is devoted to the production of TMA-2 from calamus oil, and MDMA or MDA from sassafras oil. A still further section is devoted to keeping out of trouble.

*Microbe Hunters* Fester Publications

The mental well-being of children and adults is shockingly poor. Marc Brackett, author of *Permission to Feel*, knows why. And he knows what we can do. "We have a crisis on our hands, and its victims are our children." Marc Brackett is a professor in Yale University's Child Study Center and founding director of the Yale Center for Emotional Intelligence. In his 25 years as an emotion scientist, he has developed a remarkably effective plan to improve the lives of children and adults - a blueprint for understanding our emotions and using them wisely so that they help, rather than hinder, our success and well-being. The core of his approach is a legacy from his childhood, from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc, listen to him, and recognize the suffering, bullying, and abuse he'd endured. And that was the beginning of Marc's awareness that what he was going through was temporary. He wasn't alone, he wasn't stuck on a timeline, and he wasn't "wrong" to feel scared, isolated, and angry. Now, best of all, he could do something about it. In the decades since, Marc has led large research teams and raised tens of millions of dollars to investigate the roots of emotional well-being. His prescription for healthy children (and their parents, teachers, and schools) is a system called RULER, a high-impact and fast-effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it. RULER has been proven to reduce stress and burnout, improve school climate, and enhance academic achievement. This book is the culmination of Marc's development of RULER and his way to share the strategies and skills with readers around the world. It is tested, and it works. This book combines rigor, science, passion and inspiration in equal parts. Too many children and adults are suffering; they are ashamed of their feelings and emotionally unskilled, but they don't have to be. Marc Brackett's life mission is to reverse this course, and this book can show you how.

*The Strange Case Of Dr. Jekyll And Mr. Hyde* Oxford University Press, USA

Kai Armstrong has been secretly watching Sonya Drummond for weeks. Not because her sexy curves drive Kai wild. Not because her every move sets his body on fire. Kai's watching Sonya because she's in possession of a stolen butterfly necklace—and he's been hired to steal it back, even if he has to seduce it right off her beautiful neck... When Sonya meets Kai on a single's cruise, she has no idea that he's looking for the necklace. She assumes he's there for the same reason she is: to indulge in a weeklong shipboard sex romp, no strings attached. Kai is the perfect candidate for what Sonya has in mind: Tall and gorgeous with a dark, muscular body that just won't quit. With Sonya, Kai finds himself oddly off his game. Her shy blushes remind him of chocolate raspberries and her shivers drive him out of his mind! As things heat up, Kai must make a decision: Will he betray the woman who has captured his mind and body...or give in to a delicious game where everybody wins?

*The Wrong Hands* St. Martin's Paperbacks

The classic text on clandestine chemistry just got even better. This Fifth Edition of *Secrets of Methamphetamine Manufacture Including Recipes for MDA, Ecstasy, and Other Psychedelic Amphetamines* contains the wisdom and recipes from Uncle Fester you've come to know and trust, along with some totally new techniques you won't find anywhere else! The "War on Drugs" is really a war on our civil liberties. Uncle Fester shows in excruciating detail exactly how underground chemists will always stay one step ahead of the DEA. Everyone interested in the crucial issue of drug legalization will benefit immensely from reading this eye-opening manual. Book jacket.

*Home Workshop Explosives* Hachette UK

The best book ever written in the field of clandestine chemistry has just gotten better in a new 8th edition. I have trained the champions of the field of clandestine chemistry for over 20 years, and this book gives the new techniques required for this constantly evolving field. I have uncovered a very easily done and supplied method for cooking your own ephedrine and pseudoephedrine from health food store and hardware store materials. This completely eliminates the need to show ID and buy adulterated and expensive pills containing these materials. I have also reconfigured older recipes to make use of the weaker or polluted materials now commonly found on hardware store shelves. This 8th edition shows the futility of politically motivated attempts by pandering politicians to regulate the private lives of individuals.

*The Book of Life* Loompanics Unltd

This book is intended to serve as quick reference handbook on so-called designer drugs. These new, mainly synthetic compounds are also often referred to as analogues of controlled substances. This new work provides a unique directory of 104 designer drugs. This class of drugs is rapidly growing in variety and number of compounds. Although identification, toxicology and other properties have been thoroughly investigated, their analogues and derivatives remain poorly documented. This book fills the gap. Data which is available is often contradictory and confused. This directory provides a critical treatment of the subject which is thoroughly indexed including both the subject index and an index listing more than 230 street names of the described designer drugs. Divided into two parts; the first section describes aspects of designer drug manufacture, new abuse trends, sources of information and terminology. The second, descriptive part, classifies the drugs into ten main categories according to their chemical structure and prevalent pharmacological action. A separate chapter is devoted to each category, followed by a set of corresponding data sheets, street names and eventual synonyms, Toxicological data, short notes on the history of drugs as well as the most pertinent bibliographic references are included.

*The Anarchist Cookbook* LA CASE Books

This title is out of print as of 03/02/2005. A new revised and updated edition: *Secrets of Methamphetamine Manufacture*, 7th Edition, will be available as of 03/08/2005.

*Permission to Feel* B. F. Skinner Foundation

Poisons and the art of killing with stealth are part of humanity's folklore and heritage, and in the homicidal manifesto, master chemist Uncle Fester has turned his attention to the venomousness that Homo Sapiens has wrought -- and how these toxic substances are gathered synthesized, and put to use. Fester's fascinating study includes: Inorganic Poisons -- War Gases -- Nerve Gases -- CIA Shellfish Toxins -- Time Delay Poisons -- Botulism -- And much more.

*LSD, My Problem Child* SAGE

This book describes, in step-by-step, illustrated detail, how to set up and run a clandestine drug lab -- without getting caught! Jack B. Nimble reveals how to select a location, discusses safety precautions -- including how and when to shut down -- and gives advice on covering your tracks. Sold for informational purposes only!
