CARDENAS BENJAMIN

Techno-Societal 2018 IMO
Publishing
This book presents high-
quality research papers
presented at International
Conference on
Applications of Networks,
Sensors and Autonomous

Systems Analytics
(ICANSAA 2020), held
during December, 11 - 12,
2020, at JIS College of
Engineering, Kalyani,
West Bengal, India. The
major topics covered are
cyber-physical systems
and sensor networks, data
analytics and autonomous
systems and MEMS and
NEMS with applications in
biomedical devices. It

includes novel and
innovative work from
experts, practitioners,
scientists, and decision-
makers from academia
and industry.
*Creative Expressions: Say
it with Art* CRC Press
This book provides a
collection of selected
papers presented at the
International Conference
on Cybernetics, Cognition

and Machine Learning Applications (ICCCMLA 2019), which was held in Goa, India, on 16–17 August 2019. It covers the latest research trends and advances in the areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber-physical systems, and cybernetics.

An Aesthetic Education in the Era of Globalization Springer Nature

This book gathers selected papers presented

at the Inventive Communication and Computational Technologies conference (ICICCT 2019), held on 29–30 April 2019 at Gnanamani College of Technology, Tamil Nadu, India. The respective contributions highlight recent research efforts and advances in a new paradigm called ISMAC (IoT in Social, Mobile, Analytics and Cloud contexts). Topics covered include the Internet of Things, Social Networks, Mobile Communications, Big Data Analytics, Bio-

inspired Computing and Cloud Computing. The book is chiefly intended for academics and practitioners working to resolve practical issues in this area.

Proceedings of International Conference on Intelligent Computing, Information and Control Systems

Springer Nature
NATIONAL BOOK CRITICS
CIRCLE AWARD WINNER •
NEW YORK TIMES
BESTSELLER • “Of all the stories that argue and speculate about

Shakespeare's life ... here is a novel ... so gorgeously written that it transports you." —The Boston Globe
England, 1580: The Black Death creeps across the land, an ever-present threat, infecting the healthy, the sick, the old and the young alike. The end of days is near, but life always goes on. A young Latin tutor—penniless and bullied by a violent father—falls in love with an extraordinary, eccentric young woman. Agnes is a wild creature who walks her family's

land with a falcon on her glove and is known throughout the countryside for her unusual gifts as a healer, understanding plants and potions better than she does people. Once she settles with her husband on Henley Street in Stratford-upon-Avon, she becomes a fiercely protective mother and a steadfast, centrifugal force in the life of her young husband, whose career on the London stage is just taking off when his beloved young son succumbs to sudden

fever. Don't miss Maggie O'Farrell's new novel, *The Marriage Portrait*, coming in September!

[Inventive Communication and Computational Technologies](#) Sangeeta Prasad

During the past twenty years, the world's most renowned critical theorist—the scholar who defined the field of postcolonial studies—has experienced a radical reorientation in her thinking. Finding the neat polarities of tradition and modernity, colonial and postcolonial, no longer

sufficient for interpreting the globalized present, she turns elsewhere to make her central argument: that aesthetic education is the last available instrument for implementing global justice and democracy. Spivak's unwillingness to sacrifice the ethical in the name of the aesthetic, or to sacrifice the aesthetic in grappling with the political, makes her task formidable. As she wrestles with these fraught relationships, she rewrites Friedrich Schiller's concept of play

as double bind, reading Gregory Bateson with Gramsci as she negotiates Immanuel Kant, while in dialogue with her teacher Paul de Man. Among the concerns Spivak addresses is this: Are we ready to forfeit the wealth of the world's languages in the name of global communication? "Even a good globalization (the failed dream of socialism) requires the uniformity which the diversity of mother-tongues must challenge," Spivak writes. "The tower of Babel is our refuge." In essays on

theory, translation, Marxism, gender, and world literature, and on writers such as Assia Djebar, J. M. Coetzee, and Rabindranath Tagore, Spivak argues for the social urgency of the humanities and renews the case for literary studies, imprisoned in the corporate university. "Perhaps," she writes, "the literary can still do something." [Handbook of AI-based Metaheuristics](#) CRC Press This book constitutes the refereed proceedings of the Second International

Conference on Smart Trends in Information Technology and Computer Communications, SmartCom 2017, held in Pune, India, in August 2017. The 38 revised papers presented were carefully reviewed and selected from 310 submissions. The papers address issues on smart and secure systems; smart and service computing; smart data and IT innovations.
Cambridge English Proficiency 2 Student's Book without Answers
OUP Oxford

This book features a collection of high-quality, peer-reviewed papers presented at the Fourth International Conference on Intelligent Computing and Communication (ICICC 2020) organized by the Department of Computer Science and Engineering and the Department of Computer Science and Technology, Dayananda Sagar University, Bengaluru, India, on 18–20 September 2020. The book is organized in two volumes and discusses advanced and multi-

disciplinary research regarding the design of smart computing and informatics. It focuses on innovation paradigms in system knowledge, intelligence and sustainability that can be applied to provide practical solutions to a number of problems in society, the environment and industry. Further, the book also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in various disciplines of science,

technology and health care.

Engine-room Simulator

Springer

This book is especially prepared for B.A., B.Sc. and honours (Mathematics and Physics), M.A/M.Sc. (Mathematics and Physics), B.E. Students of Various Universities and for I.A.S., P.C.S., AMIE, GATE, and other competitive exams. Almost all the chapters have been rewritten so that in the present form, the reader will not find any difficulty in understanding

the subject matter. The matter of the previous edition has been re-organised so that now each topic gets its proper place in the book. More solved examples have been added so that now each topic gets its proper place in the book. References to the latest papers of various universities and I.A.S. examination have been made at proper places. *Cybernetics, Cognition and Machine Learning Applications* Routledge
First published: IMO, 1990.

Marine Electrical Technology, 4/e H/C

Springer Nature

This book by famed sixth-century historian Jordanes offers a history, written less than a century after the death of Attila, on the various barbarian tribes' dealings with the Western Roman Empire and their contributions to the fall of the Empire.

Theory of Computer

Science Harvard University Press

This book, divided in two volumes, originates from Techno-Societal 2018: the 2nd International

Conference on Advanced Technologies for Societal Applications, Maharashtra, India, that brings together faculty members of various engineering colleges to solve Indian regional relevant problems under the guidance of eminent researchers from various reputed organizations. The focus is on technologies that help develop and improve society, in particular on issues such as the betterment of differently abled people, environment impact,

livelihood, rural employment, agriculture, healthcare, energy, transport, sanitation, water, education. This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region. On the other hand, technologies proposed by expert researchers may find applications in different regions. This offers a multidisciplinary

platform for researchers from a broad range of disciplines of Science, Engineering and Technology for reporting innovations at different levels.

Smart Trends in Information Technology and Computer

Communications Yale University Press Jens Zimmermann suggests that the West can rearticulate its identity and renew its cultural purpose by recovering the humanistic ethos that originally

shaped Western culture. He traces the religious roots of humanism, and combines humanism, religion and hermeneutic philosophy to re-imagine humanism for our current cultural and intellectual climate.

The Elements of Color
Springer

The Oxford Handbook of Modernisms is an unparalleled resource. It extends the scope and depth of previous synoptic guides, bringing together new approaches to the more obvious themes of modernist studies as well

as new research on the variety of cultural, aesthetic, and geographical factors that were intrinsic to the creation of modernism.

Handbook of Wireless Sensor Networks: Issues and Challenges in Current Scenario's University of Notre Dame Press

This book emphasizes the importance of art in education for our schools. It provides an outline of the artistic developmental stages of children ages two to twelve years, as well as an introduction to art therapy. Art not only

enhances a child's creativity, but also provides an opportunity for children to express their individual experiences and ideas. These theories are brought to life through detailed lesson plans. A chapter on art appreciation demonstrates how to use art to teach art.

The Boke of Saint Albans Technical Publications

The volume presents high quality research papers presented at Second International Conference

on Information and Communication Technology for Intelligent Systems (ICICC 2017). The conference was held during 2-4 August 2017, Pune, India and organized communally by Dr. Vishwanath Karad MIT World Peace University, Pune, India at MIT College of Engineering, Pune and supported by All India Council for Technical Education (AICTE) and Council of Scientific and Industrial Research (CSIR). The volume contains research papers focused on ICT for

intelligent computation, communications and audio, and video data processing. *Hamnet* Springer Nature The Book has been thoroughly revised, keeping in mind the rapid technological advances in this mammoth industry and also the feedback received from various quarters. Relevant extracts from current SOLAS, IACS, Lloyd's Register, DNV and ABS Rules, have been included with permission. However, these must be used only for academic purposes.

Relevant current documents onboard ships must be referred to, for the purpose of complying with Classification Societies' and other Statutory Requirements. *Intelligent Communication Technologies and Virtual Mobile Networks* McGill-Queen's Press - MQUP There are a lot of e-business security concerns. Knowing about e-business security issues will likely help overcome them. Keep in mind, companies that have control over their e-business are likely to

prosper most. In other words, setting up and maintaining a secure e-business is essential and important to business growth. This book covers state-of-the art practices in e-business security, including privacy, trust, security of transactions, big data, cloud computing, social network, and distributed systems.

[The Gothic History of Jordanes in English Version](#) Cambridge English

This book includes the original, peer reviewed

research articles from the 2nd International Conference on Cybernetics, Cognition and Machine Learning Applications (ICCCMLA 2020), held in August, 2020 at Goa, India. It covers the latest research trends or developments in areas of data science, artificial intelligence, neural networks, cognitive science and machine learning applications, cyber physical systems and cybernetics.

Computer Communication, Networking and IoT

Springer Nature
This book presents the outcomes of the Intelligent Communication Technologies and Virtual Mobile Networks Conference (ICICV 2019) held in Tirunelveli, India, on February 14-15, 2019. It presents the state of the art in the field, identifying emerging research topics and communication technologies and defining the future of intelligent communication approaches and virtual computing. In light of the tremendous growth ICT, it

examines the rapid developments in virtual reality in communication technology and high-quality services in mobile networks, including the integration of virtual mobile computing and communication technologies, which permits new technologies based on the resources and services of computational intelligence, big data analytics, Internet of Things (IoT), 5G technology, automation systems, sensor networks, augmented reality, data

mining, and vehicular ad hoc networks with massive cloud-based backend. These services have a significant impact on all areas of daily life, like transportation, e-commerce, health care, secure communication, location detection, smart home, smart city, social networks and many more. *Ship Operations and Management* Springer The importance of various electrical machines is well known in the various engineering fields. The book provides comprehensive coverage

of the magnetic circuits, magnetic materials, single and three phase transformers and d.c. machines. The book is structured to cover the key aspects of the course Electrical Machines - I. The book starts with the explanation of basics of magnetic circuits, concepts of self and mutual inductances and important magnetic materials. Then it explains the fundamentals of single phase transformers including the construction, phasor diagram, equivalent

circuit, losses, efficiency, methods of cooling, parallel operation and autotransformer. The chapter on three phase transformer provides the detailed discussion of construction, connections, phasor groups, parallel operation, tap changing transformer and three winding transformer. The various testing methods of transformers are also incorporated in the book. The book further explains the concept of electromechanical energy conversion including the discussion of singly and

multiple excited systems. Then the book covers all the details of d.c. generators including construction, armature reaction, commutation, characteristics, parallel operation and applications. The book also includes the details of d.c. motors such as characteristics, types of starters, speed control methods, electric braking and permanent magnet d.c. motors. Finally, the book covers the various testing methods of d.c. machines including Swinburne's test, brake

test, retardation test and Hopkinson's test. The book uses plain, lucid language to explain each topic. The book provides the logical method of explaining the various complicated topics and stepwise methods to make the understanding easy. Each chapter is well supported with necessary illustrations, self-explanatory diagrams and variety of solved problems. All the chapters are arranged in a proper sequence that permits each topic to build upon earlier studies. The book

explains the philosophy of the subject which makes the understanding of the concepts very clear and makes the subject more interesting.
